

r

1)DELEITEAR EL RESTAURANTE CON NOMBRE "P & S Deli Grocery"

BY LUIS.

```
db.restaurants.remove({"name":"P & S Deli Grocery"})
```

YERAY

```
db.restaurants.deleteOne({"name":"P & S Deli Grocery"})
```

```
db.restaurants.deleteMany({"name":"P & S Deli Grocery"})
```

```
db.restaurants.deleteOne({"name":"P & S Deli Grocery"})
```

```
db.restaurants.remove({"name":"P & S Deli Grocery",{justOne:true}})
```

2)Canviar el nom de "name" : "Morris Park Bake Shop" a "Morris Park Avenue Bake Shop"

//ARNAU

```
db.restaurants.updateOne({"name":"Morris Park Bake Shop"}, {$set: {"name":"Morris Park Avenue Bake Shop"}})
```

3)Afegir l'atribut "dogs_allowed":3 a "restaurant_id" : "40361390"

Dani

```
db.restaurants.updateOne({"restaurant_id":"40361390"}, {$set: {"dogs_allowed":3}})
```

4)Canviar l'atribut "dogs_allowed": a 4 al "restaurant_id" : "40361390"

dani

```
db.restaurants.updateOne({"restaurant_id":"40361390"}, {$set: {"dogs_allowed":4}})
```

5) Esborrar l'atribut "dogs_allowed" al "restaurant_id" : "40361390"

Luis

```
db.restaurants.updateOne({"restaurant_id":"40361390"}, {$unset: {"dogs_allowed":""}})
```

6) insertar el restaurant amb restaurant_id:"123456789", "name":"Tacos", "cuisine":"Mexican" a Manhattan

Dani

```
db.restaurants.insert({"restaurant_id":"123456789", "name":"Tacos", "cuisine":"Mexican",  
"borough":"Manhattan"})
```

7)) Modificar el restaurant amb restaurant_id:"234567890", "name":"Los Tacos", "cuisine":"Mexican" a "Queens". Si no hi és insertar-lo.

Dani

```
db.restaurants.updateOne({"restaurant_id":"234567890"}, {$set:{"name":"Los Tacos",  
"cuisine":"Mexican", "borough":"Queens"}}, {upsert:true})
```

```
{  
  "acknowledged" : true,  
  "matchedCount" : 0,  
  "modifiedCount" : 0,  
  "upsertedId" : ObjectId("5c783d46969699bee7cf155")  
}
```

8) Actualitzar el restaurant amb restaurant_id:"234567890"

Atributs a actualitzar "name":"Los Tacos", "cuisine":"Mexican" a "Queens".

Si existeix incrementar visites

Si no hi és

- insertar-lo
- afegir "visites":1

```
db.restaurants.updateOne(  
{restaurant_id:"234567890"},  
{$set: {name: "Los Tacos", cuisine: "Mexican", borough:"Queens"},  
$inc: {visites: 1}}, {upsert: true} )
```

If the field does not exist, [\\$inc](#) creates the field and sets the field to the specified value.

9) Modificar el restaurant amb restaurant_id:"234567890"

- , "name":"Los Tacos"
- "cuisine":"Mexican"
- a "Bronx"
- "dogs_allowed":1

Després de la modificació només ha de tenir els atributs anteriors.

```
db.restaurants.updateOne({"_id" : ObjectId("5c783d422819639bee7cf155")}, {"restaurant_id" :  
"234567890", "name":"Los Tacos", "cuisine":"Mexican", "borough":"Bronx", "dogs_allowed":1 })
```

Joan

```
db.restaurants.update({restaurant_id:"234567890" },{name: "Los Tacos", cuisine: "Mexican",  
borough:"Bronx", "dogs_allowed":1}, { } )
```

```
db.restaurants.update({ "_id" : ObjectId("5c796153c905f07d4816e1e5") }, {name: "Los Tacos", cuisine:  
"Mexican", borough:"Bronx", "dogs_allowed":1}, { } )  
WriteResult({ "nMatched" : 1, "nUpserted" : 0, "nModified" : 1 })
```

Dani

```
db.restaurants.update({ "_id" : ObjectId("5c783d422819639bee7cf155")}, {"restaurant_id" :  
"234567890", "name":"Los Tacos", "cuisine":"Mexican", "borough":"Bronx", "dogs_allowed":1 })
```

dani

```
db.restaurants.update({restaurant_id:"234567890" }, {"restaurant_id" : "234567890", name: "Los Tacos",  
cuisine: "Mexican", borough:"Bronx", "dogs_allowed":1}, { } )
```

10) Modificar street

```
"street" : "Cornelia Street" a "street" : "Cornellà Street"
```

```
"street" : "East 60 Street" a "street" : "East 60 Street"
```

Dani

```
db.restaurants.updateMany({"address.street":"Cornelia Street"},{$set:{"address.street":"Cornellà  
Street"}})  
{ "acknowledged" : true, "matchedCount" : 8, "modifiedCount" : 8 }
```

```
db.restaurants.updateMany({"address.street":"East 60 Street"},{$set:{"address.street":"East 60  
Street"}}){ "acknowledged" : true, "matchedCount" : 20, "modifiedCount" : 20 }
```
